Synergies is always working to bring advanced and innovative engineering solutions for its customer. Also our global sourcing team is committed to bring the best cost effective solutions in the shortest possible time.

**Individual Spare Parts Supply**
- Reducing TCP
- Inventory & Stock
- Annual Rate Contracts
- Flexible Payment Options

**Engineering Projects**
- Process Improvement Projects
- Expansion Projects
- Modification

**Maintenance, Repair & Operation**
- Hydraulics MRO
- Filtration & Oil Conditioning
- Miscellaneous MRO

- Global sourcing experts for products, solutions and services – Total Workforce of 200+
- Supplying more than 300 Brands
- Authorized supplier for more than 30 globally renowned industrial brands

- Service solutions from experts
- Quick response and fast deliveries
- Technical sales team trained from the manufacturers.
Product Category Maintenance, Repair & Operations

Synergies Tech follows a systematic problem solving approach. We are fully capable of supporting our customers for Spares, Projects and MRO. With the support and experience of our partners we solve complex industrial problems:

Our range of product sourcing is not limited to the authorized distributorship alone. We strive to fulfill the all customer needs through our global sourcing network. Our key objective is to bring down the TCP (Total Cost of Purchase) for our customers and help customers to achieve substantial saving for their organization.

Fields of Application

Engineering Division

Refinery Applications

- Hydrocracker
- De-Sulphurization
- Metering Skids
- Distillation Columns
- Hydrotreaters

Other internal processes for production of:
- LPG
- Naptha
- Butane
- Propane
- Jet Fuel/Kerosene
- Diesel
- Fuel Oil
- Asphalt & Misc.

Petrochemical Applications

Processes related to production of:
- Ethylene
- Ethylene Glycol
- Propylene
- Polyethylene
- Benzene
- HDPE
- LDPE
- LLDPE
- BTX
and other derivatives

Metallurgy Applications

Equipment and components which are involved in the below processes:
- EAF (Electric Arc Furnace)
- DR (Direct Reduction)
- Casting
- Hot Rolling
- Cold Rolling
- Pickling Lines

Environmental Application

Equipment and components involved in the below processes:
- De-Nitrification of exhaust gases
- Fugitive Dust Suppression
- De-Sulfurization
- Pollution Control
- Contamination Control (Air/Water/Oil)
- Water Treatment
